This acid causes deep exfoliation which dramatically reduces fine lines, open pores, skin pigmentation & uneven texture. The final step entails a de-celerator which calms the skin, boosts skin repair and leaves your skin smoother, clearer, softer & brighter. A course of 3 Peels can be purchased for €180.

Banish Breakouts

are you
a teenager?

Dermalogica® ClearStart Teen Facial | (30mins) €35

Nearly all teenagers will experience breakouts at some point. We have all been there and know how frustrating it is.

Dermalogica® ClearStart is a range of products specifically designed to treat teenage breakouts while also improving overall skin condition. Many teenagers make the mistake of using many products they see advertised to treat spots but sometimes these products can aggravate the concern in the long term. This is where consulting with a professional skin therapist can be invaluable to discuss their skin concerns and how to get results with their products.

Dermalogica® ClearStart Facial is perfect for teenage boys and girls. Your therapist will bring you into the treatment room and talk with you about how you find your skin. We will complete a double cleanse with steam to make sure we do a really good deep cleanse. Your therapist will complete a skin analysis and decide how best to treat your skin today while also giving you the chance to ask any questions you may have about your skin. An exfoliation is carried out to remove any dead cells which may be blocking your pores and extractions are done to help clear congestion. A masque is then applied which is customized depending on what your skin needs are. To finish, your therapist will apply her chosen aftercare for you and discuss your homecare.

This is a fantastic treatment to help clear teenage skin while also providing education on how best to treat their skin! Parents are more than welcome to come along too.

Tips for the perfect wax

Make sure your hair is long enough to remove completely from the roots – it should be at least 0.5 centimetres. If you've shaved the area within the last few weeks it might take a couple of waxes to get your hair into a cycle of growth that allows the most effective wax finish.

As your skin closes over the follicles, the next consideration is to ensure you prevent ingrown hairs. This is when new, often softer hair can get trapped under the skin. A few simple measures can easily avoid this situation.

Use a soft brush or exfoliating glove to gently buff the area every 2-3 days – this is particularly important after about day 3 through to about the 10 day mark. It doesn't need to be hard scrubbing, just a gentle exfoliation.

The added bonus of following the aftercare advice (apart from your skin looking hair free and smoother for longer), is that it really will make your next wax a whole lot quicker and less painful.
